## CONFERENCE OBJECTIVES

### Upon completion of the conference you will be able to:

1. Discuss new treatment options of multiple myeloma, AML, and CNS giving the different perspectives of multi-disciplinary physicians.
2. Learn the new technology of interventional oncology.
3. Explain the importance of CAR-T, the benefits of herbal product utilization, and what personalized medicine means to the clinical oncology setting.
4. Share the different perspectives of treatment and care of breast cancer case studies from the expertise of many oncology professionals.
5. Learn organizational skills from a professional Oncology Management Coach.

### CONFERENCE OUTCOME MEASURES:

Participants should be able to apply the knowledge acquired during this conference to improve their competence, performance, and/or patient outcomes in the daily treatment of their patients. To measure attendees perceptions of these gains, they will complete an evaluation form at the end of the conference.
