AstraZeneca 

The LungXperience roadshow is traveling to cities across the United States, offering the public and medical professionals an interactive and educational opportunity to learn more about lung cancer and the scientific advances being made to treat this disease.

Go to the iOS App Store or Google Play to download the AppAR8 augmented reality platform on your smartphone or tablet device.

Then open the app to launch the viewer. Once launched, point the camera at the AR image code to activate the experience on your device screen.
